

1<sup>st</sup> February 2024

Dear resident

**Abnormal load deliveries to Cleve Hill Solar Park.**

I am writing to let you know that the current construction phase of the solar park will shortly require abnormal load deliveries to site via Monkshill Road and Seasalter Road.

Monkshill Road is an approved route under the terms of the Development Consent Order and as set out in the Construction Traffic Management Plan.

Planning for these deliveries has been in progress over a period of months and has been discussed at the fortnightly meetings of the Construction Traffic Management Group (CTMG). The CTMG is attended by residents, Parish Councillors, representatives of GREAT (Graveney Rural Environment Action Team), the headteacher of Graveney Primary School, a Swale Borough Council planning officer, and the solar park construction project team.

We have employed Colletts, a leading haulage company specialising in abnormal loads, who have inspected and approved the route along Monkshill Road and Seasalter Road.

There will be a total of six abnormal load deliveries in the coming months, the first three are scheduled to take place within the period 7<sup>th</sup> – 29<sup>th</sup> February. This window allows for global manufacturing constraints that may affect delivery dates.

Each delivery will require a short-term traffic management period in Monkshill Road (approximately 45 minutes) and a further period in Seasalter Road of an estimated 15 minutes. Two escort vehicles will accompany each delivery, one in front and one behind the HGV. Marshalls will halt and direct traffic using stop/go signs during the movements and will be available to assist in an emergency.

Please see the enclosed sheet for further information on what to do in the event of an emergency during the delivery transit period.

The traffic management plans include advance warning signs.

The remaining three AIL deliveries will take place in March and we will let you know more details nearer the time.

I apologise for any temporary inconvenience these delivery movements may cause.

Thank you for your patience.

Yours sincerely

David Fisher  
Head of Construction
